

IDS LED Keypad

South Africa's leading manufacturer and distributor of electronic security products

The new generation LED keypad from IDS is instantly recognizable by its bold, distinctive design.

By installing an IDS LED keypad at a key entry point in your home or small business, you'll be able to see information about your security system at a glance.

Two options are available:

- The first is an 8-zone keypad for the IDS 805 alarm panel.
- The second is a 16-zone keypad for the IDS 816 and 1632 panels.
