

FOQUS™ - for small rooms

FOQUS™ is specially designed for small rooms, expanding the possibilities for fog protection.

In addition to completely securing small spaces, such as server rooms and small offices, FOQUS™ can also be used as localised protection in larger spaces. With localised protection, a small, well-defined area can be filled with fog very quickly. For example, a car hire company with a large, open display room has installed FOQUS™ right over the key box behind the service desk.

FOQUS™ shares its respected and high-quality technology with PROTECT's other Fog Cannon models, and like them, it is developed and produced in Denmark.

PRODUCT**

Specifications FOQUS™

Fog generation	Rooms up to 25 m ² /269 ft ²
Fog production settings	Three possible durations: 8/86, 16/172, and 25/269 m ² /ft ² .
Pulse effect	Two settings (3- or 6-pulse shots)
Fog fluid container	1.1 litre (same as model 600 and 1100)
No. of 21 sec. shots per container	Min. 20
Mains connection	230 V, 50 Hz
Power consumption	700 W
Standby consumption (after warm up)	55 W
Standby consumption (when heat is disabled)	5 – 10 W
Warm-up time from cold	7 min.
Dimensions (mm)	L: 400 mm, W: 240, H: 135
Installation weight	7 kg
Input	5 signals
Output	3 signals
Battery back up (2 x 12 V, 1.2 Ah)	Electronics and pumps
Built-in automatic battery loading	Yes
Control settings (fog duration, signals, warm up)	On/off DIP switches
Signals/Indicators	Audible, optical, and electrical
PCB status indicator	Yes
After fog activation	Can shoot several times (pulse option)
Warm-up time after fog activation	½ – 3 min.
Data log memory	Yes
Possibility of 2 different angled nozzles	Yes (straight ahead and 30°)
Metal casing colour	White
Scope of applications	Small offices, ATMs, corridors, private homes etc.

We reserve the right to modify due to misprint or changes in the technical data.
